

To put more outlets in lecture rooms in the Spark

Sometimes when I'm in a lecture, my laptop dies and I can't take notes. The only outlets in most rooms in the Spark building are on the ground, very spread apart, so it's inconvenient to have to move to be able to reach it, sometimes having to move chairs or tables. There are also only usually two or three outlets in the room, which is an issue for larger classes. Most of the work we do is online, so having a charged electronic device is essential to succeeding in class. The other students I've spoken to say they agree, and wish there were more outlets available to them. If we could install more outlets or add power strips to classes, it would benefit Solent students by allowing them to focus on their work without having to worry about charging their electronics.
