| Motion Title | SU to promote vegan options available at university and support expansion |
| Motion Explanation | Here at Solent there are some vegan options however they are very limited and slightly hidden as there is no promotion of them. The catering team have begun to expand some vegan options and make them more visible on the app, however they will not sell well if they are not promoted and will have to be removed. I would like the SU to not only promote the options but also promote the benefits of a plant based diet. Not only is it inclusive of religions but also it can reduce carbon emissions and help reduce climate change effects. Veganism already has a lot of unfair stigma attached to it, so much so that is actually supposedly protected under the Equalities Act, it would help a lot if the university was supportive of the diet. https://www.bbc.co.uk/news/science-environment-49238749 https://www.earthday.org/un-report-plant-based-diets-provide-major-opportunities-to-address-climate-crisis/ https://thehumaneleague.org/article/environmental-benefits-of-veganism |
