Motion Title	Apprenticeship student/course rep. support and guidance
Motion Explanation	<p>"I would really appreciate more directed support towards apprenticeship students and course rep's. I appreciate students who attend university most days in a week are incredibly busy and the SU dedicate a lot to all students however, apprenticeship students are managing work life, placements, home life, and student life with limited time on campus during a given week. My motion towards the SU is to request adapted or specialise training, and expectations of apprenticeship-specific course reps, which could better equip us to cascade the appropriate support to the members of our course/cohort.</p> <p>It seems the SU is represented well initially at the start of life at university, but as time progresses, the information given can become a bit of a distant memory as students become engrossed with academic workloads in addition to full time employment. My question to the SU includes, how can you demonstrate continued reassurance and appreciation of these unique types of students? As I believe, driving more support towards apprentices could benefit us mentally and socially, boost academic confidence and remind us of support available throughout the university.</p>
